Abstract

The diversity of understanding of the implementation of the Early Childhood Education (ECD) and the level of competence of ECD teachers are still low causing a difference in providing for early childhood learning. With the utilization of Information and Communication Technology (ICT) and Knowledge Management is expected to increase the competence of ECD teachers through effective learning system. This research uses the methodology of system development with the prototype method. The results of this study is a mobile knowledge management prototype which is implemented on the Android platform.

Keywords: Early Childhood Education (ECD), Knowledge Management, Mobile Knowledge Management Prototype
